PROFESSIONAL SUMMARY

Full Stack Developer with hands-on expertise in MERN stack, React Native, and AI integration. Proficient in MCP Servers, LLM integration, and building scalable applications.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, PHP, JavaScript (ES6+)

Frontend Technologies: React.js, React Native, Redux, Redux Saga, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & Databases: Node.js, Express.js, Spring Boot, MongoDB, MySQL, PostgreSQL, Neo4j

AI & Advanced Technologies: MCP Servers, LLM Integration, AI Application Development, AI tools usage, Prompt engineering

Architecture & Tools: REST APIs, Microservices, MVC Architecture, Git, GitHub, Visual Studio Code, npm, System design

KEY PROJECTS

AI Resume Analyzer - Full Stack MERN Application

- Developed a full-stack web application where users can upload resumes and receive AI-based analysis with scoring and improvement suggestions
- Implemented JWT-based authentication with secure password hashing using bcrypt for user data protection
- Built RESTful APIs with Node.js/Express for resume text extraction and comprehensive analysis processing
- Designed MongoDB schema for efficient storage of user data, resumes, and detailed analysis reports
- Created intuitive React frontend for seamless resume upload, analysis results display, and report viewing
- Implemented advanced file upload handling, text processing algorithms, and automated score calculation mechanisms

Online Book Shopping Center - Full Stack E-Commerce MERN Platform

- Designed and built full-featured online bookstore with secure authentication system, comprehensive product catalog, shopping cart functionality, and order management
- Implemented Redux and Redux Saga for complex state management and seamless handling of asynchronous API calls
- Built RESTful APIs with Node.js/Express backend, MongoDB database persistence, and responsive React UI ensuring compatibility across all devices

Scaffold Generator - Project Boilerplate and Setup Automation Tool

- Created automated project generator tool allowing developers to select features and frameworks to significantly reduce setup time and boilerplate code requirements

ADDITIONAL PROJECTS

Expense Tracker - Personal Finance React Application

- Built comprehensive personal finance application with expense logging functionality, automatic categorization, and real-time visualization using React.js and Local Storage for data persistence

Notes Application - Desktop Notes Manager

- Developed full-featured desktop notes application in Java with complete file I/O operations, note creation and editing capabilities, and persistent storage functionality

EDUCATION

Master of Computer Applications (MCA), Aravali Institute of Technical Studies (AITS), Udaipur, Rajasthan - 2023-Present

Bachelor of Science - Computer Science, MLSU Science College, Udaipur, Rajasthan - Completed

CORE COMPETENCIES

Full-stack web development with MERN stack | Mobile development with React Native | Advanced state management using Redux and Redux Saga (and more) | LLM integration and AI application development | MCP Servers implementation | REST API design and development | Responsive UI design
